So, GarageBand and many more video and sound editing programs This plugin has won a number of awards for clocking different sound together as one. These are just for your use, Omnisphere does not need them You can place them with your usual sound library files if you wish. With the Go 'drop-down' menu up on the screen hold down your 'alt' key on your keyboard to 'unhide' the Library folder. Open Omnisphere in your DAW / music host When the Omnisphere interface loads, please press the 'CHECK FOR UPDATES' button (top-left) and ensure all green lights are showing and that you have installed all of the needed updates. Omnisphere 2 Patch Update (Please note - The Unfinished libraries contain 'Patches' presets and 'Multi's' presets. For Mac users - To locate the CORRECT location to place your files, from within the Finder menu (across the top of your screen) select 'Go' - e(10c4156f)
